

Shock Shield and Chain-guard Extension

Tiger 800 / 800XC

This Kit Includes:-

1x Shock Shield guard and a separate chain-guard extension (only fits until 2014)
Pyramid "No Screws" Glue, a square of sandpaper and an alcohol wipe.

NOTE: For best results make sure room temperature is at least 12 degrees or above.

- Key surface of Shock Shield with Sand paper provided.
- Key surface of Chain Guard Extension and Chain Guard if required.
- Clean all Surfaces with warm soapy water and dry.
- Wipe surfaces with alcohol wipe provided.
- Apply Pyramid No Screws to areas of contact (pictured) on both Shock Shield and Chain Guard if required. Please note that the glue requires moisture in the air to set, please try to refrain from putting it all in one place and creating large "pools" of glue
- Use a clamp to secure chain guard in place and using a large piece of fabric or something to that effect force it into the area between the rear wheel and Shock Shield firmly securing it in place
- Leave to set for a minimum of 24 hours, please **DO NOT** be tempted to "test" the adhesion, if it doesn't hold because of this it makes a lot of mess and is hard to rectify the problem.
