Notes	Where not supplied use original fittings	dB Killer	SCEXDBK42 - (Type MM)

A) Remove original exhaust from bike, taking care to keep all original components in a safe place.

B) Remove the gasket from the original exhaust and fit it to the Scorpion header pipe.

C) Loosely fit the header pipe using the original bolts, then slip on the connecting pipe.

D) Fit the mounting bracket to the scooter following the diagram above ensuring all bolts are tight as the silencer will block these bolts.

E) Slide the silencer on to the connecting pipe and mount the silencer to the bracket following the line diagram.

F) Once you're happy the silencer is fitted correctly, tighten all fittings starting at the header pipe.

G) Fit the springs to secure the fitting between the silencer and connecting pipe and the fitting between the connecting and header pipes.

H) When fitted, take scooter for a short test run, upon return allow the scooter to cool and check all nuts and bolts are secure.
