Aprilia Tuono 660 Radiator Guard

Installation Instructions

Kit Contents PRN015464

- Ⓐ 1 x Radiator Guard
- Ⓑ 6 x Rubber Bungs

4

Locate round holes amongst hexagons.

Push Rubber Spacer through from the back of the guard so Hexagonal shape sits on the front face

The inset diagram shows a close-up of a hexagonal hole in the metal guard. A black rubber spacer is being pushed through the hole from the back side. A green arrow points to the spacer. The text explains that the spacer should be pushed through from the back so that the hexagonal shape of the spacer sits on the front face of the guard.

ESSENTIAL CHECKS

It is recommended that periodic inspections are made to ensure that dirt and debris have not become trapped between the guard and the radiator/oil cooler. Such dirt and debris would reduce the cooling efficiency of the radiator/oil cooler.

It is recommended that periodic inspections are made to ensure that all fixings are fully tightend.
