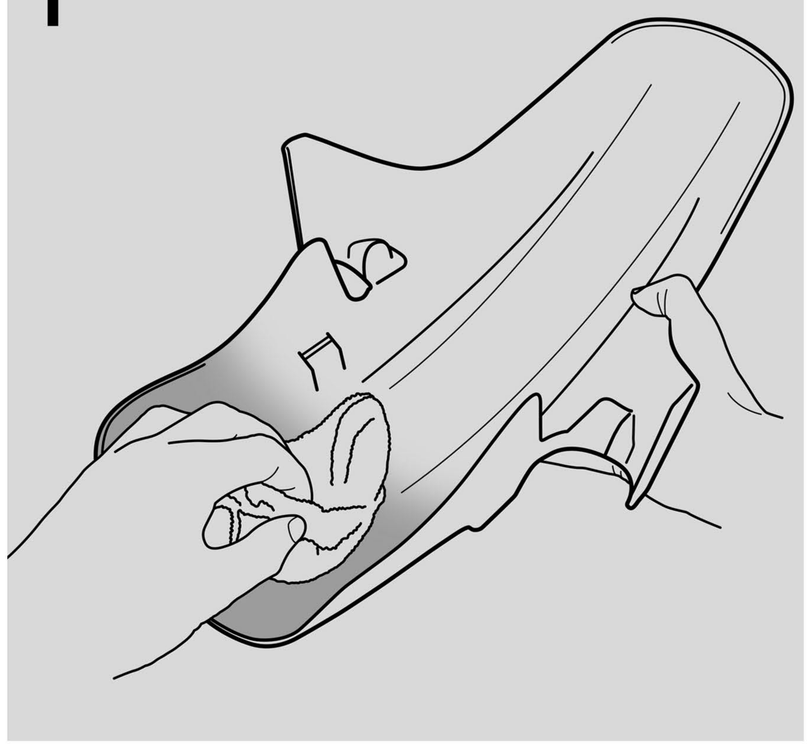
PYRAMID

Fitment method A

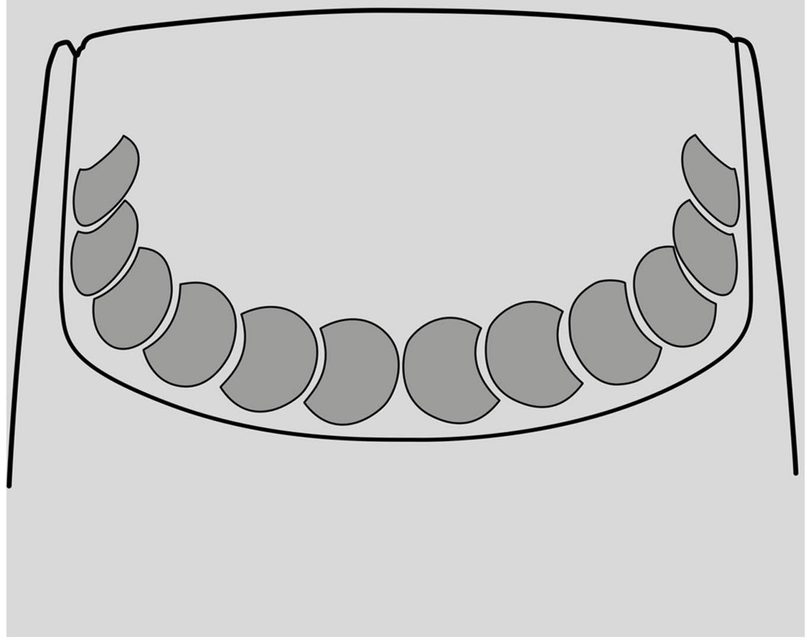
| Push-Rivet | Extenda Fenda & Hugger Extension Fitting Instructions

1



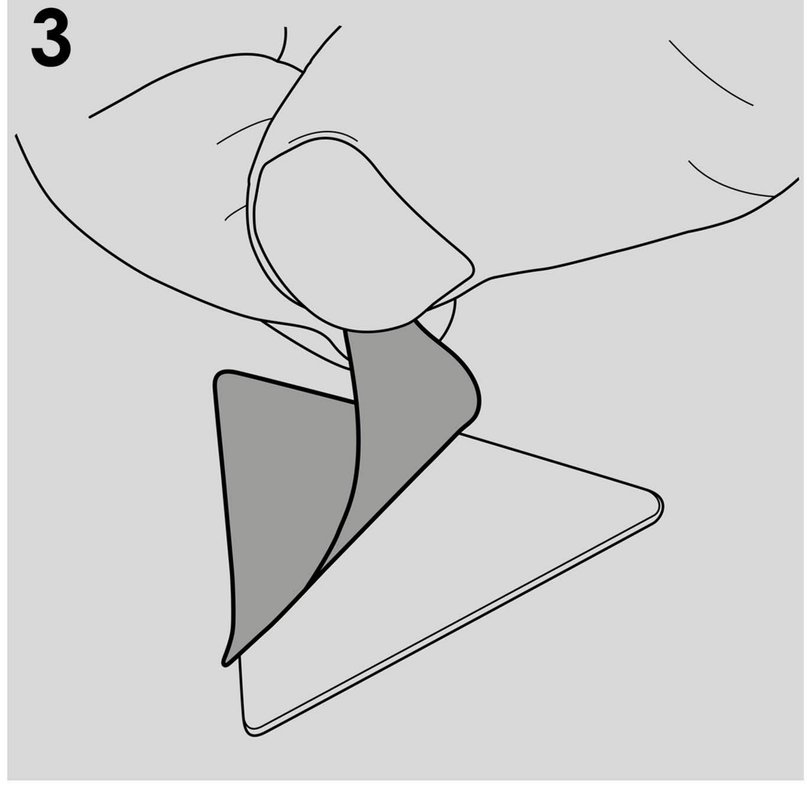
Remove mudguard from bike & clean inside.

2



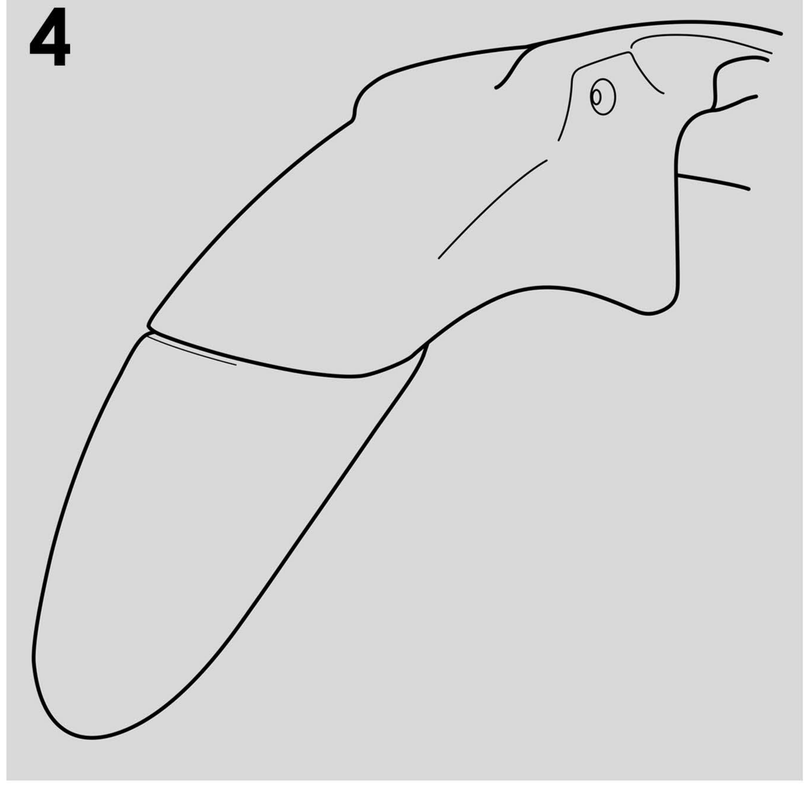
Attach a few Stick-Fit pads to the Extenda Fenda/
Hugger Extension in area shown to create a gasket.

3



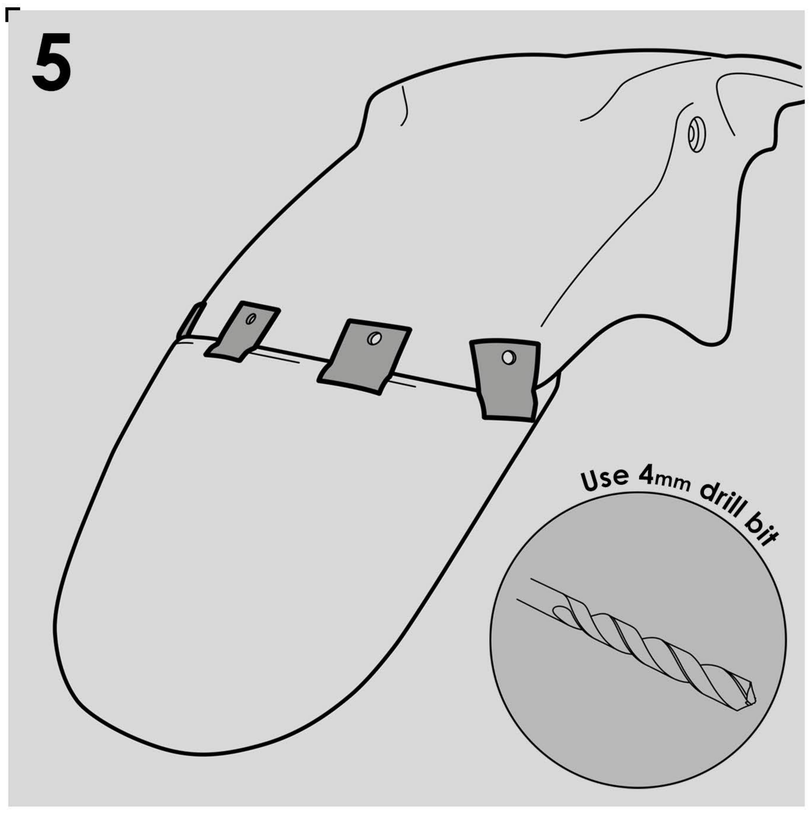
Peel backing paper from Stick-Fit pads.

4



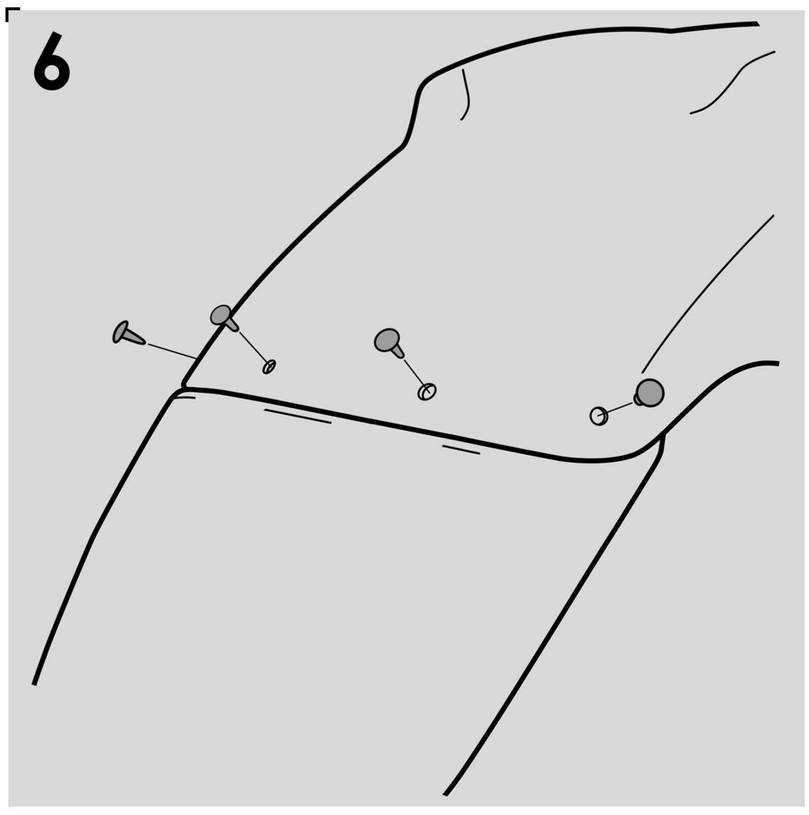
Fit Extenda Fenda/Hugger Extension to mudguard
and check for alignment before step 5.

5



Use masking tape to mark equally spaced drilling points.
Drill through the Extenda Fenda/Hugger Extension & mudguard at each point.

6



Fit Push-Rivets provided and re-fit mudguard to bike.

PYRAMID

Fitment method B

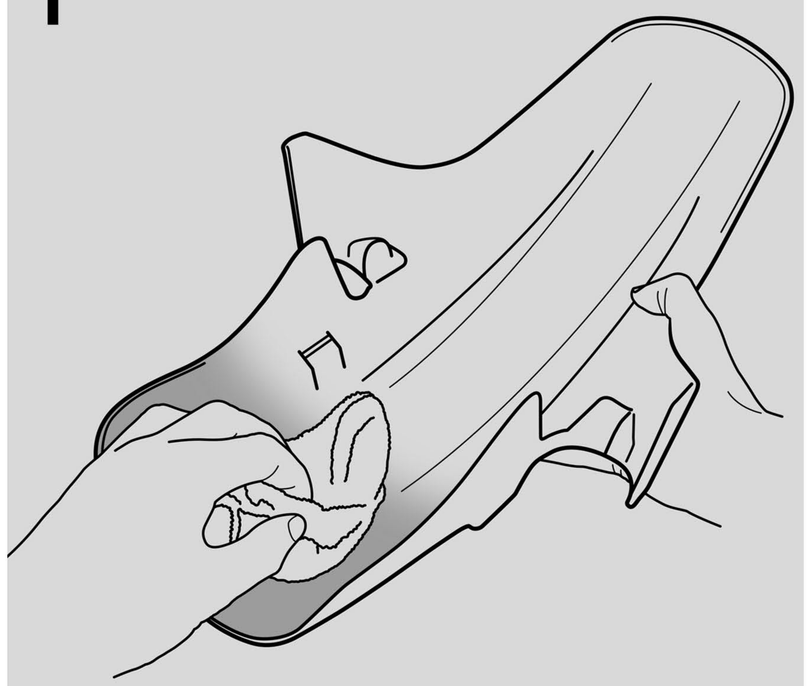
| Stick-Fit | Extenda Fenda & Hugger Extension Fitting Instructions

Important notes:

- Avoid any cleaning product other than hot soapy water and wipe supplied, any oils or solvents will reduce adhesion dramatically.

- We advise lighlty keying both surfaces with sandpaper (inside guard and extenda face) to give the best stick fit.

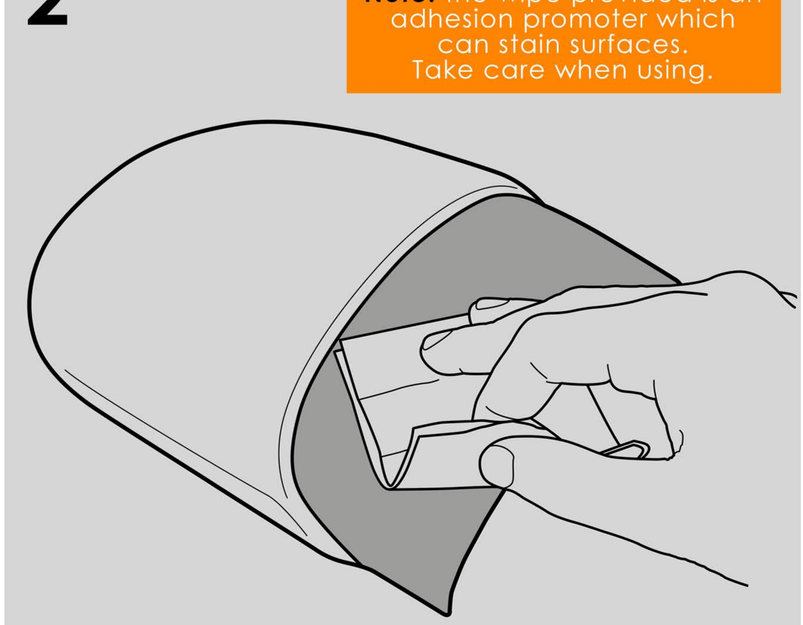
1



Remove mudguard from bike & clean inside.

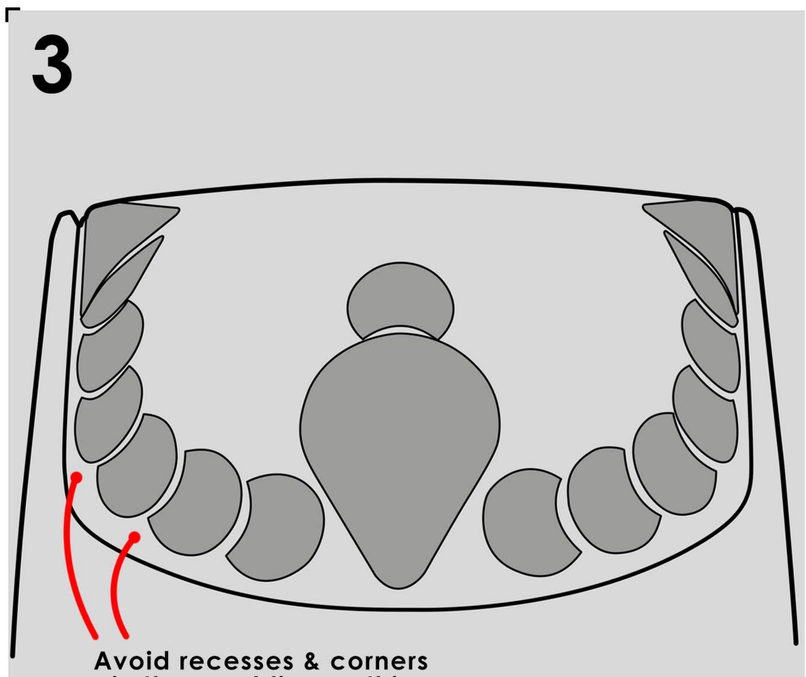
2

Note: the wipe provided is an adhesion promoter which can stain surfaces. Take care when using.



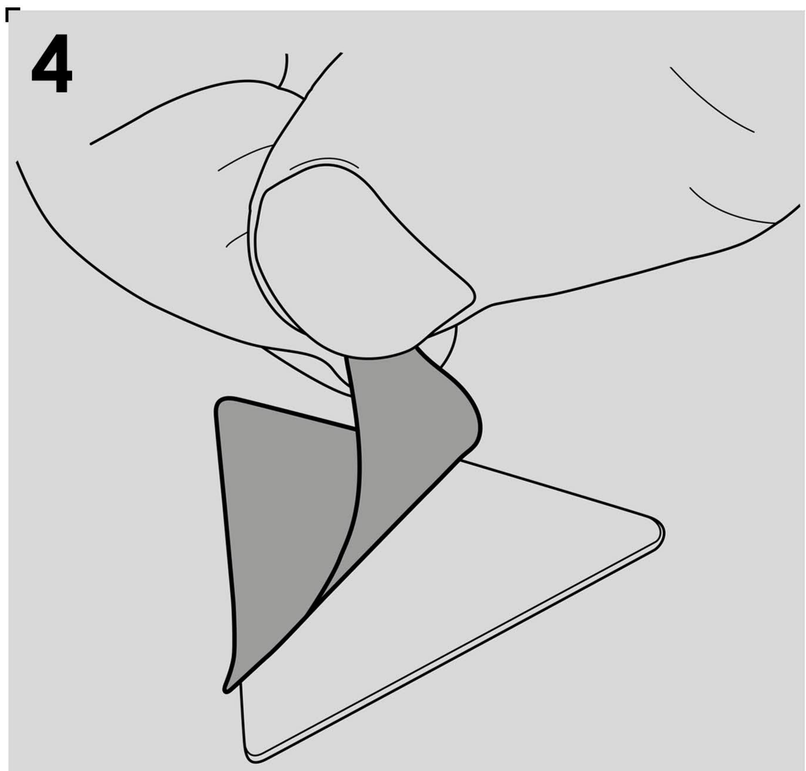
Prime the fitting areas of the OEM mudguard and Pyramid mudguard extension using the wipe supplied.

3



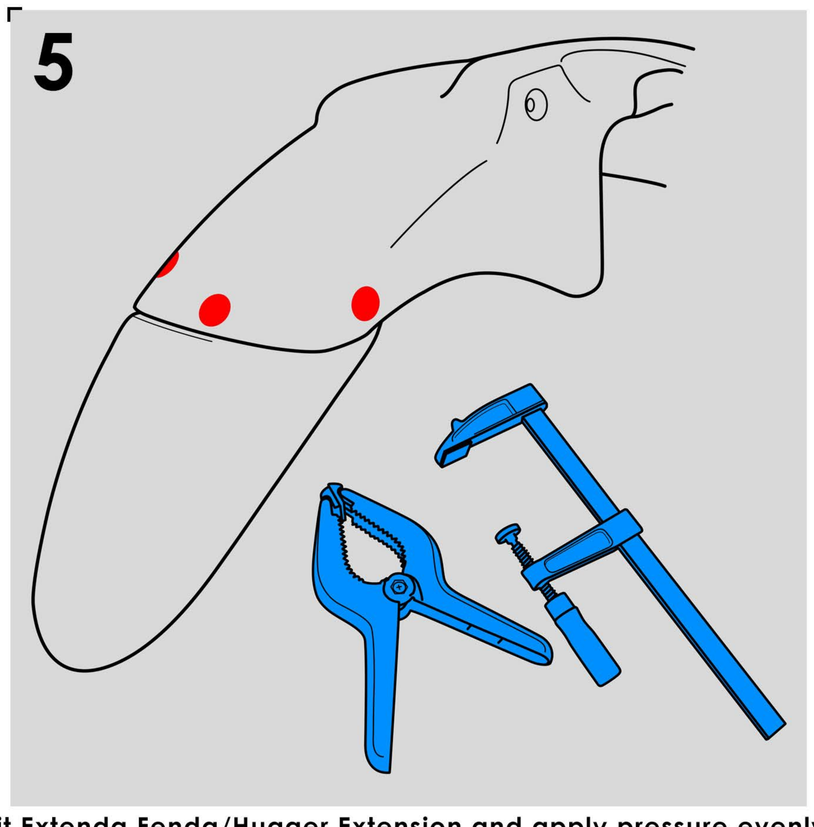
Attach Stick-Fit pads to the Extenda Fenda/ Hugger Extension using this diagram as a guide. Check alignment before step 4.

4



Peel backing paper from Stick-Fit pads.

5



Fit Extenda Fenda/Hugger Extension and apply pressure evenly. Pyramid suggest using clamps as shown in Blue. (Appling pressure on the central and outer edges is crucial).

6

Allow to cure for 12 hours. Re-fit mudguard to bike.
