

Decal Application Instructions

- Be sure to work indoors on a clean surface.
- Thoroughly clean the product you are applying the decals to. Making sure there is no dust or dirt present is important for getting the best bond between the adhesive and product.
- Carefully peel the decal off the backing paper. The decal should stick to the clear application tape. (see Fig 1)
- Position the decal with the application tape onto the desired area of your motorcycle or accessory. Once it's in place, press down firmly, starting from the center and working outwards to remove any air bubbles. (see Fig 2)
- Slowly peel the application tape away, ensuring the decal remains stuck to the surface. If the decal lifts with the tape, press it back down and try peeling again. (see Fig 3)
