

The ezCAN plugs directly into your motorcycle and listens to the CAN-bus. The best plug and play solution to add accessories to your motorcycle without the need to cut any wires that could void your warranty.

This is the latest version of the ezCAN with four high power output channels which have ultimate configuration!

Customize your bike and make it safer to ride.

This device works on the following Harley Davidson models:

- Pan America 1250 (2021-On)
- Pan America 1250 Special (2021-On)
