

085190M Honda NT-1100 Spray Guard 2022> Fitting Instructions

Kit Includes:

1.	X1	C085200	Spray Guard Cap Moulding
2.	X1	CFK085190A	Mounting Bracket 'A'
3.	X1	CFK085190B	Mounting Bracket 'B'
4.	X2	CBOLM80010	M8 x 25mm Button-Head Bolt
5.	X4	CWASM80001	M8 Flat Steel Washer
6.	X2	CNUTM80003	M8 Nyloc Nut
7.	X1	CSPA0174	ABS Spacer

Please Note: We strongly advise against mounting additional items on any of the spray guard components. We have deemed it unsafe to do so and such action will invalidate all warranty on the product.

Items 1 - 7 (excluding item 3) come pre-assembled, making installation quick and easy.

Assembly Instructions

- Please ensure the motorcycle has been safely placed on the its **centre stand** or has been raised at the rear of the bike with an appropriate **paddock stand**.
- Remove the nut and washer from the spindle on the **rider's 'RHS'** of the bike. Continue by also removing the adjustment block, as this will be replaced by the Spray Guard components.
- Position the mounting bracket 'B' (Item 3) so that the hole for the spindle is closest to the adjustment screws and ensure that the chamfered edges are against the inside face of the swing arm. This ensures that the screw adjusters for the chain are correctly positioned.
- Place the mounting bracket 'A' (Item 2), which is pre-assembled to the spray guard cap (Item 1), over the already situated mounting block. Proceed by threading the OEM spindle washer and nut back onto the motorcycle. See 'FIG.1' for reference.
- **Hand tighten** the nut before fully tightening to the required torque rating. Ensure the chain adjuster screws are tight to the block and that the wheel is straight. The exposed thread lengths will help indicate this.
- Finally, fully tighten the spindle nut with a torque wrench. The rating is 88Nm.
- Installation of the Pyramid Spray Guard is now complete.

Please Note: We advise that all fixings are checked periodically.

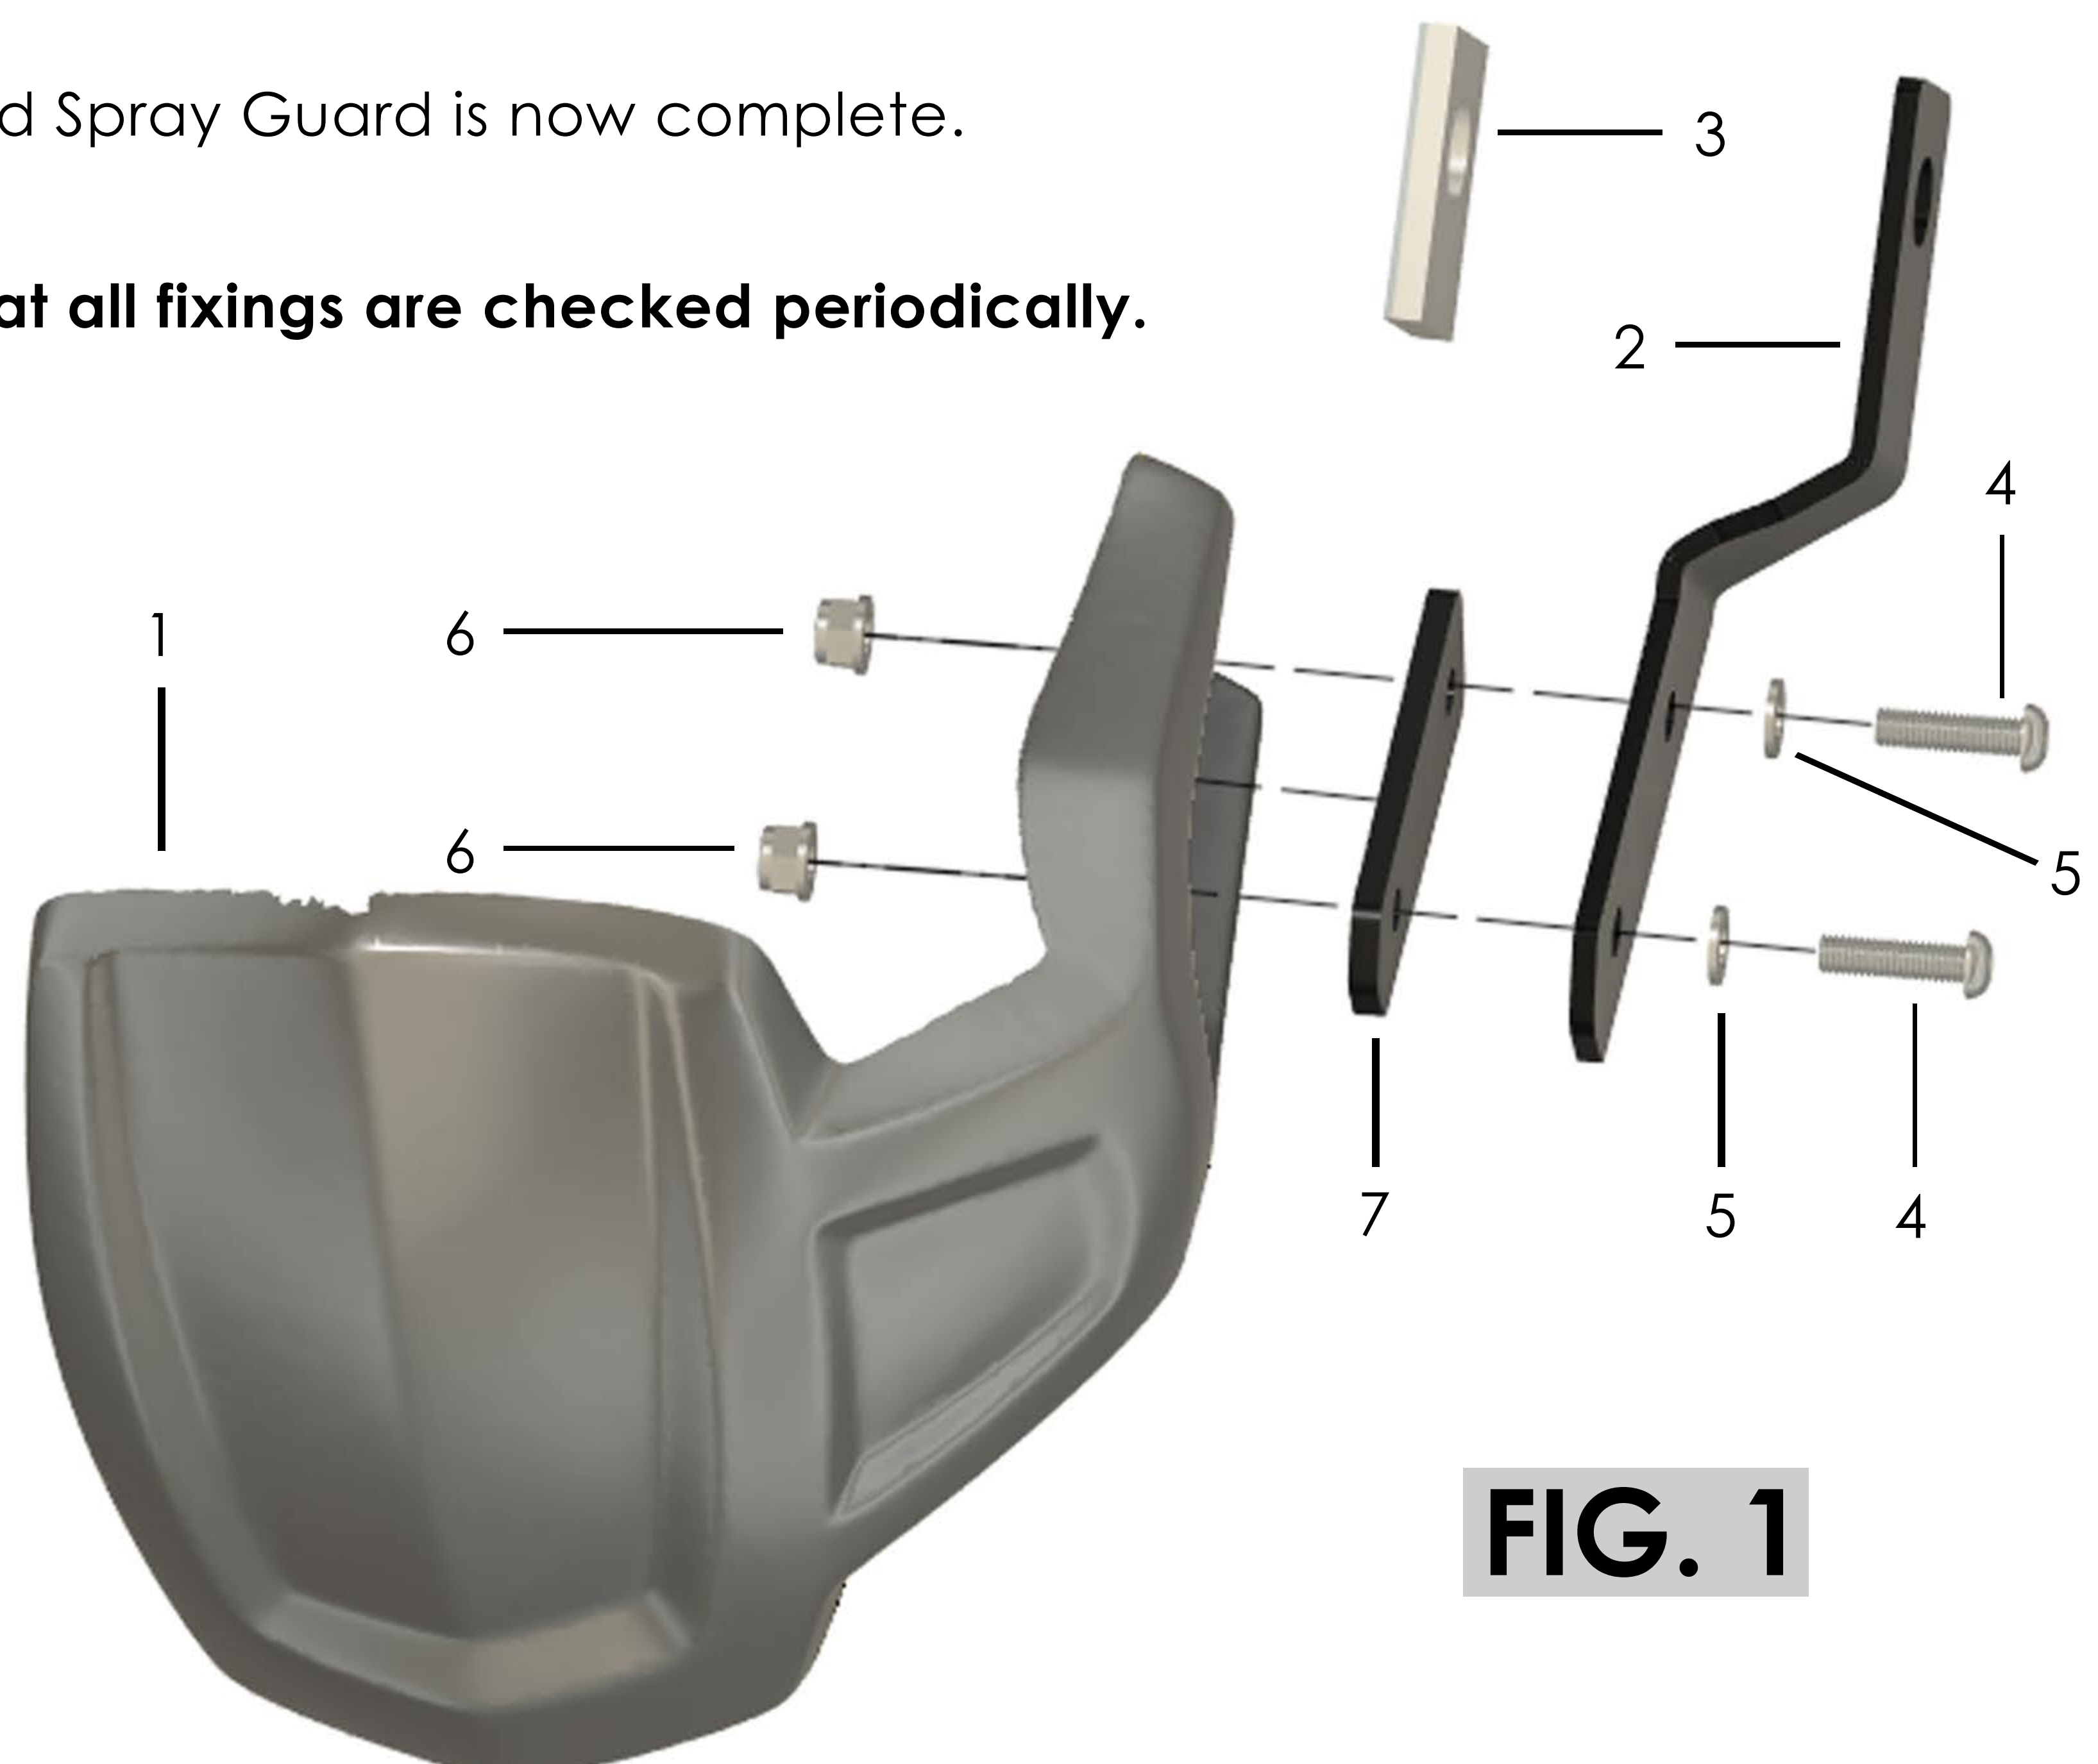

FIG. 1
