

ER5 HUGGER Part # 073860

Fitting kit:

2 x M6 x 16mm button allen bolt – CBOLM60008

2 x M6 s/steel washer – CWASM60001

2 x M6 nylon washer – CWASM60004

4 x cable tie –(including 2 spares) CAB0430

Fitting instructions:

It is Pyramid policy to avoid the use of cable ties to mount huggers. However, in this instance they provide the best solution with out resorting to unsightly brackets.

It is advisable to thoroughly clean the swing arm prior to fitting the hugger.

The hugger fits over the existing chain guard. Secure it with the bolts supplied using steel and nylon washers under the head of the bolts.

The other side of the hugger is secured using two cable ties. Take care to avoid the brake rod when positioning the cable ties.

Check hugger location and alignment before finally tightening all fasteners and cutting back the cable tie ends.

Please note: check hugger alignment and fasteners periodically.
