

Kit Includes:

1.	X1	C16142	Seat Cowl
2.	X5	C090001	3M Velcro Strip Pre-assembled by Pyramid
3.	X2	C090002	Black Velcro Strip (Soft 'Loop' Surface) - 2x 470mm Length
4.	X2	C090002	Black Velcro Strip (Rough 'Hook' Surface) - 2x 270mm Length

Assembly Instructions

- Remove the seat from the motorcycle.
- Attach the soft 'loop' velcro strips as shown in **Fig 1**. Ensure a tight fitment with no slack.
- Position the seat cowl on the seat as shown in **Fig 2**. It can help to rest the seat and seat cowl on a suitable surface to hold the seat cowl in the required position.
- With the seat cowl in the correct position, join the two ends of the soft 'loop' velcro strips to the rough 'hook' velcro strips. Again, ensure a tight fitment with no excess slack (See **Fig 2**).

Note: It may be necessary to trim excess length from the velcro strips using scissors (once a tight fitment is achieved).

- Refit the seat on the motorcycle.
