

522005 Yamaha MT-09 (SP) + Tracer 9 (GT/+) Radiator Guard Fitting Instructions

Kit Includes:

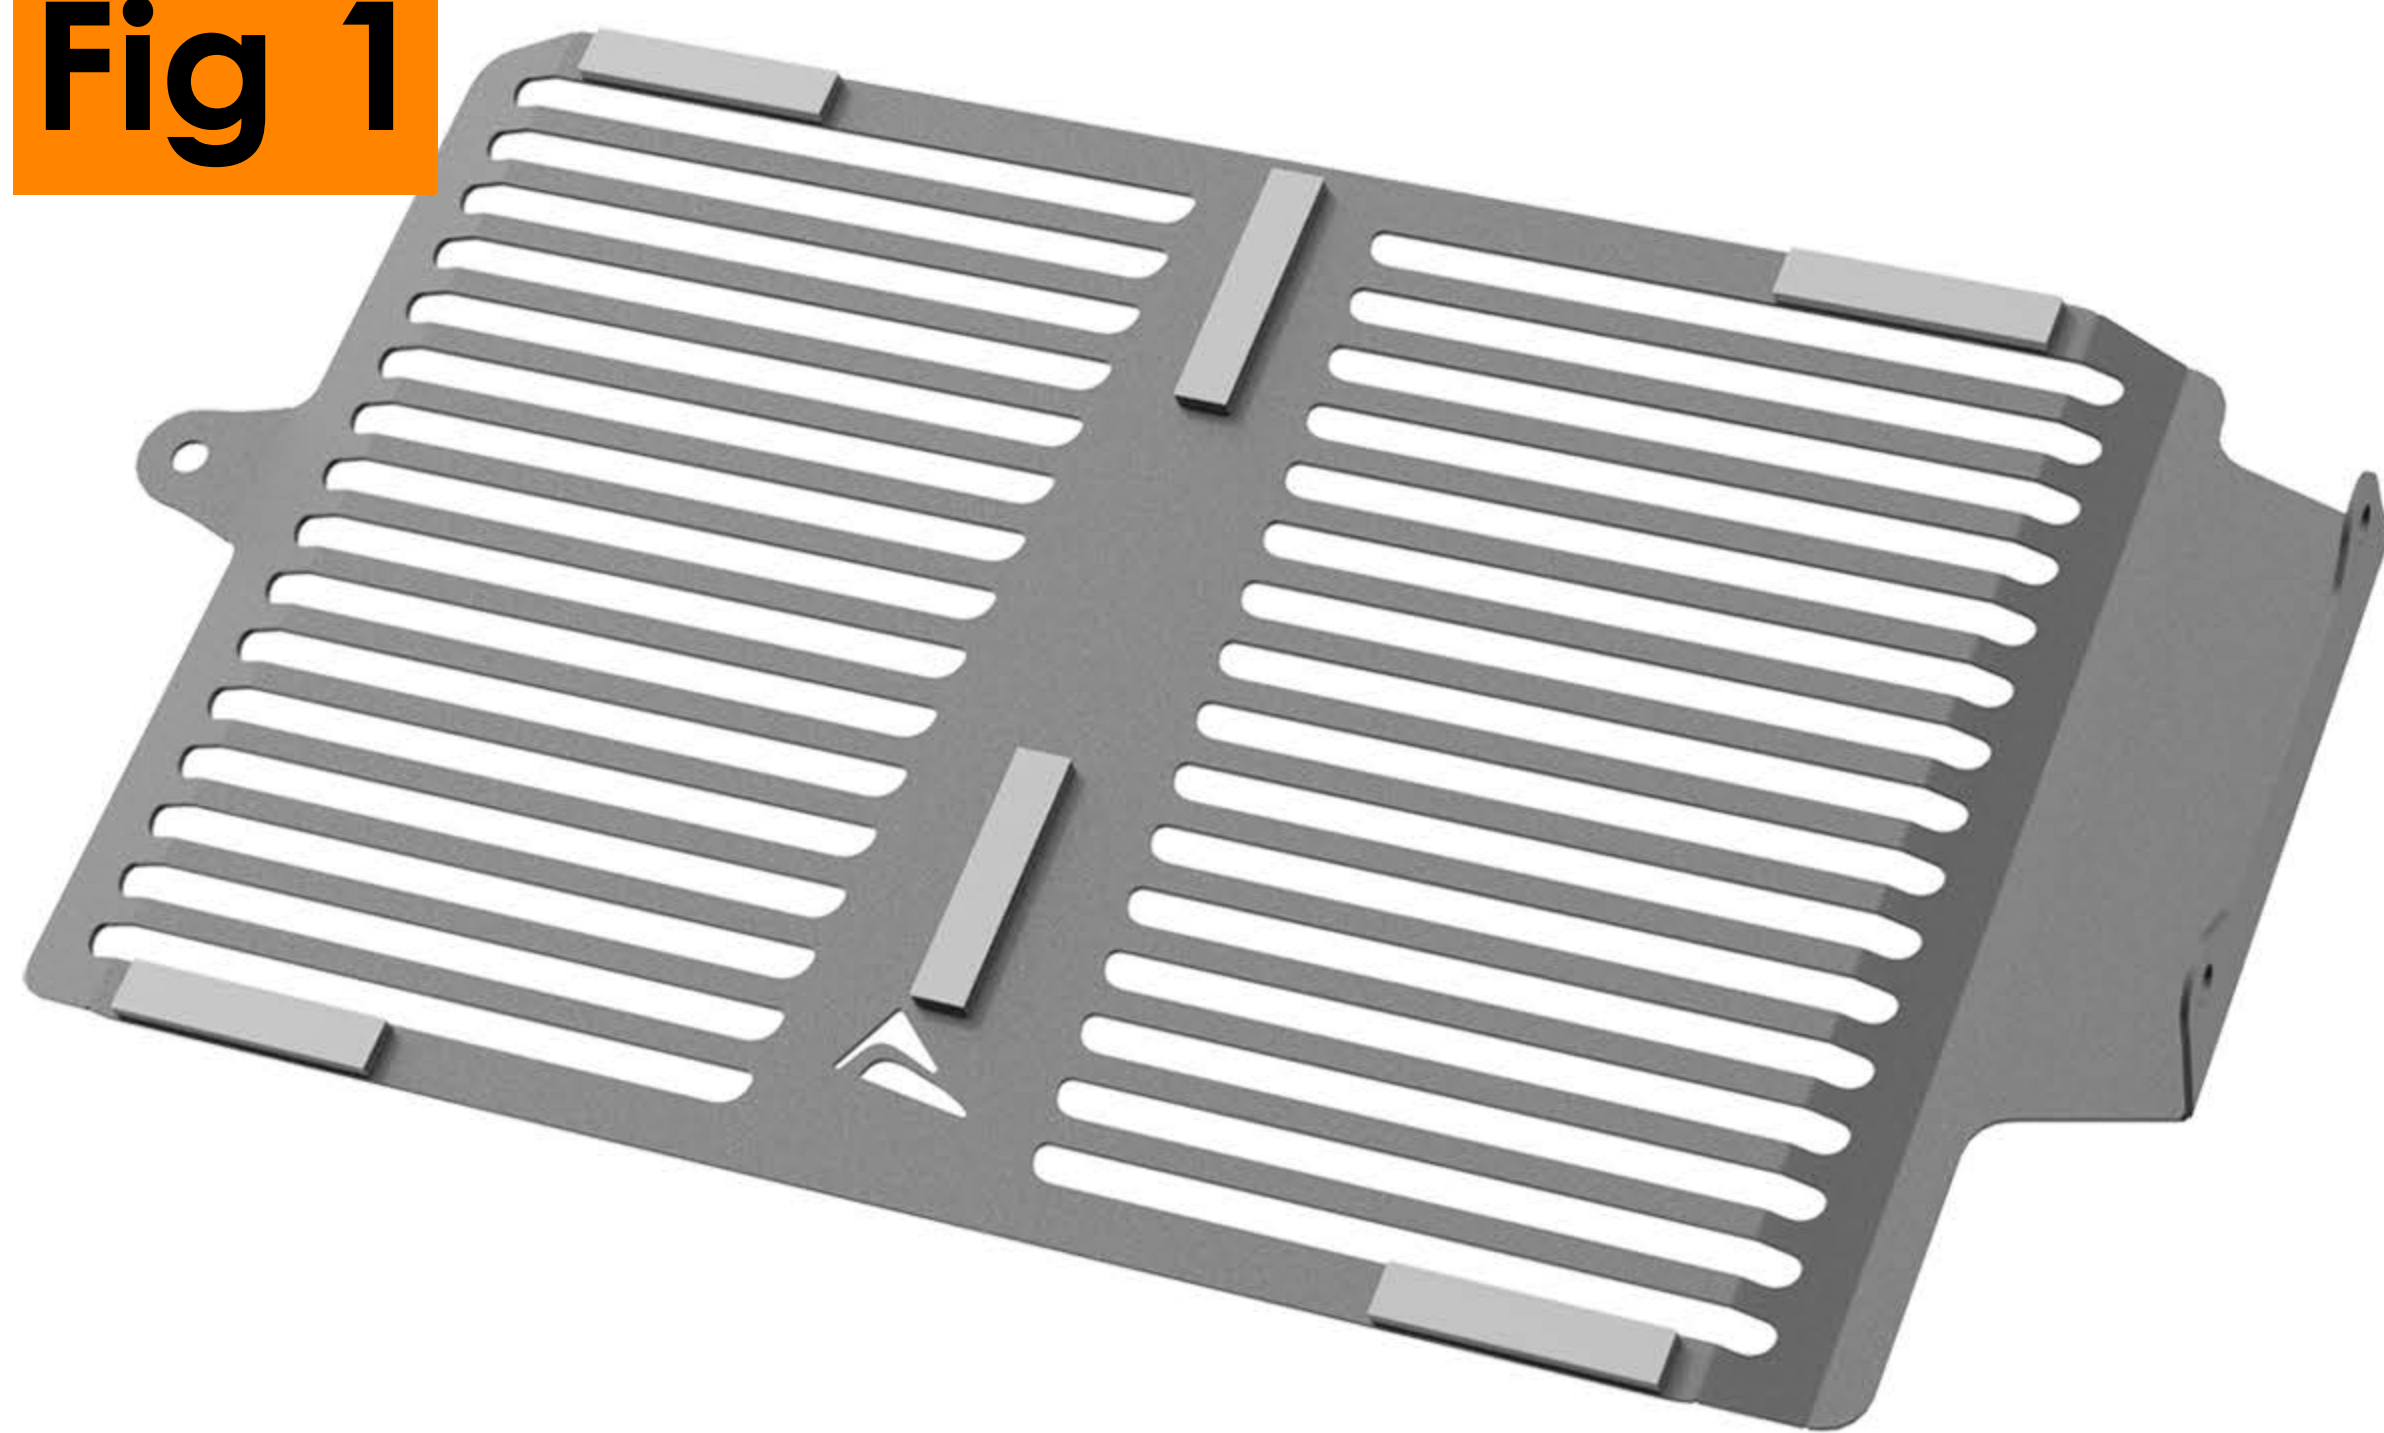

1.	X1	C522005	Radiator Guard
2.	X6	CFOA0001	Foam Strips (6x 50mm lengths)
3.	X1	CBOLM60007	M6 x 12mm Bolt (for Tracer only)

/ MT-09 instructions below - Please turn over for Tracer 9 instructions \

Assembly Instructions

- Start by fitting the provided foam strips to the inside of the radiator guard as shown in **Fig 1**.
- Remove the side panel covers on each side of radiator (see **Fig 2**).
- Remove the side panels on each side of the radiator (see **Fig 3**).
- Position the radiator guard as shown in **Fig 4** and refit the right-hand side panel loosely to hold the radiator guard in position.
- Now remove the bolt shown in **Fig 5** and fit the radiator guard using this same bolt.
- Refit the side panels and covers (fully tightening all mounting points).
- Be sure to check fixings periodically.

Assembly Instructions

- Start by fitting the provided foam strips to the inside of the radiator guard as shown in **Fig 1b**.
- Remove the side fairing panels on each side of the motorcycle (see **Fig 2b**). On both sides there is one bolt at the front of the fairing, one at the rear and two pop rivets on the inside at the bottom near the radiator.
- Remove the two bolts holding the mounting bracket from the right-hand side of the radiator - Re-fit the mounting bracket using the same bolts with the radiator guard behind the mounting bracket (shown in **Fig 3b**).
- Fit the left-hand side of the radiator guard to the radiator using the bolt supplied as shown in **Fig 4b**.
- Refit the side fairing panels (fully tightening all mounting points).
