

xSystem 3.0+ Information Pack

40 Years of Innovation

- Scottoiler are the world experts in chain lubrication systems for motorcycles
- The xSystem 3.0+ is the culmination of 40 years of innovation experience
- Manufacturers of class leading products with representation in over 45 countries
- High quality products approved to ISO 9001 and ISO 14001 standards
- Supplier to the OEM's for over 10 years including BMW Motorrad and KTM
- The only chain oiler company to offer environmentally friendly biodegradable oils
- Scottoiler is a Carbon Neutral Company

Scottoiler xSystem 3.0+ & Essentials micro xSystem 3.0+

- The new xSystem 3.0+ and micro xSystem 3.0+ are Bluetooth enabled so they can connect directly with your smartphone via the new Scottoiler App
- The xSystem 3.0+ can be adjusted remotely or with the buttons providing even greater levels of refinement and control
- Connects to a switched live or direct to the battery for power so it's as easy as ever to install
- With additional hardware and software updates the xSystem 3.0+ maintains its position as the most advanced motorcycle chain oiler

Identification

- The xSystem 3.0+ packaging design uses the same colours as the versions of the xSystem which came before it so that it is easily identifiable as part of the xSystem product family and the Scottoiler range
- As well as carrying the new 3.0+ number designation it also includes the Bluetooth logo and smart phone graphic showing the new Scottoiler App

Identification

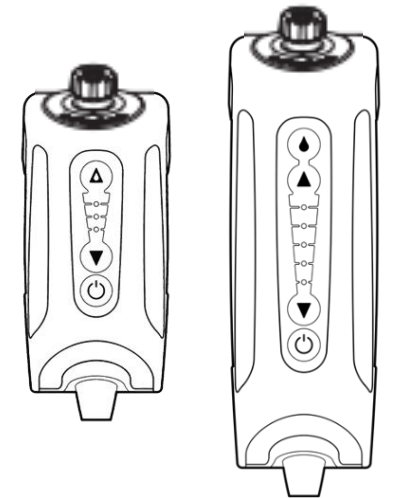

- The reverse carries more information about the Scottoiler App that is free to download from both the Apple Store and the Google Play Store
- Available with 250ml (8.4fl.oz US) of Scottoil you can specify either Standard Blue, High Temperature Red or All Climate Biodegradable Green kits
- Following the launch of the xSystem 3.0+ we will also introduce an Essentials micro xSystem 3.0+. Like the Essentials micro vSystem this will be available as a 'dry' kit without any oil included and as the name suggests, it will have approximately half the fluid carrying capacity giving a range of roughly 750 miles (1,200km).

Identification

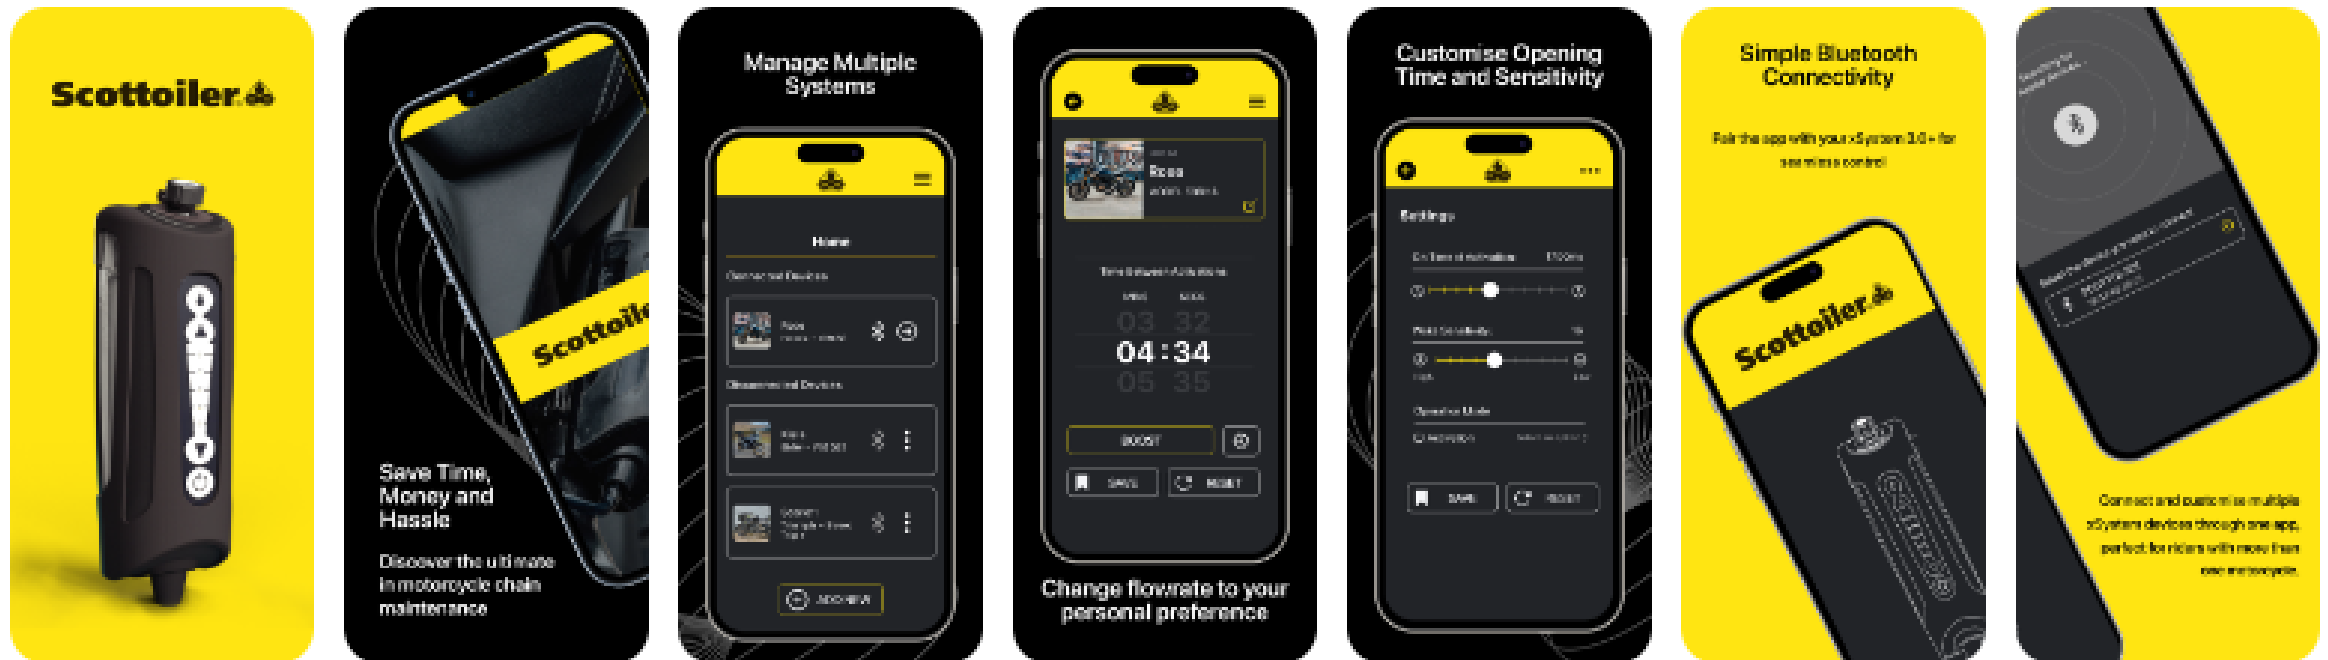

- The xSystem 3.0+ kits have unique SKU and barcode references which are shown on the reverse of the packaging alongside recycling information for the packaging and product
- Unique serial numbers and compliance markings (CE, UKCA & FCC) are also present on the reverse of each xSystem unit
- The micro xSystem 3.0+ is identifiable by its 3 buttons rather than 4 and 3 LED's instead of 5 as on the full size unit
- The product SKU's and barcodes will be as follows:

SKU	Product Description	Barcode
SO-8005-30P	xSystem 3.0+ Standard Blue	724722600972
SO-8020-30P	xSystem 3.0+ High Temperature Red	724722600989
SO-8150-30P	xSystem 3.0+ All Climate Biodegradable Green	724722600996
SO-8050-30PBL	xSystem 3.0+ Oiler Unit	724722601016
SO-8500-30P	Essentials micro xSystem 3.0+	724722601047
SO-8550-30PBL	micro xSystem 3.0+ Oiler Unit	724722601054

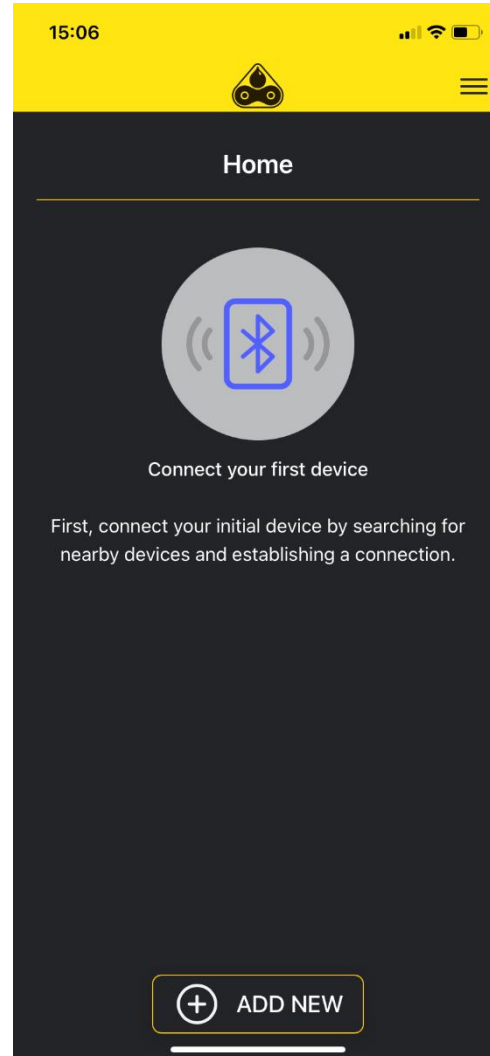

The All New Scottoilier App

- The Scottoilier App will be available to download for free from both the Apple Store and Google Play Store

The All New Scottoilier App

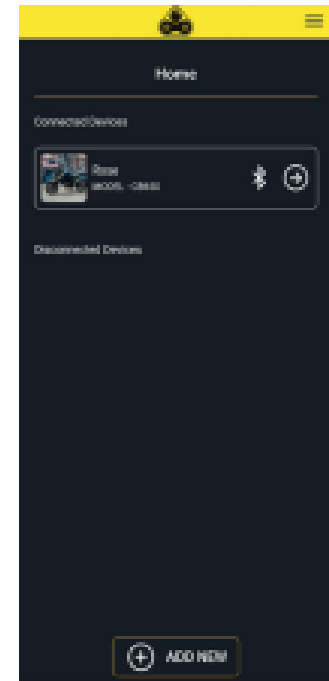

- For those with more than one motorcycle in the garage the Scottoilier App will allow them to monitor and control multiple devices so it will be great for training schools, rental and hire companies such that managing the chain maintenance of their fleet has never been easier
- Once paired you can prime, make adjustments to the flow rate, sensitivity and open time making the most advanced chain oiler system even smarter!

The All New Scottoiler App

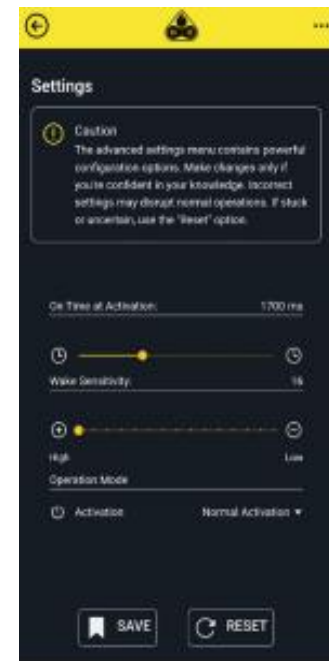

- The Scottoiler App is configured so that only one mobile phone can connect to your xSystem at a time. If you want to change mobile phones you will need to reset the device ensuring the security of your xSystem unit is always maintained
- The Devices Screen shows all active xSystem units with one mobile phone able to control multiple units. Enter the details of your motorcycle and add a picture for each profile for easy identification. If you have more than one motorcycle you can see an overview of all available xSystems. Simply press 'Add New' to add a new xSystem to the App

The All New Scotttoiler App

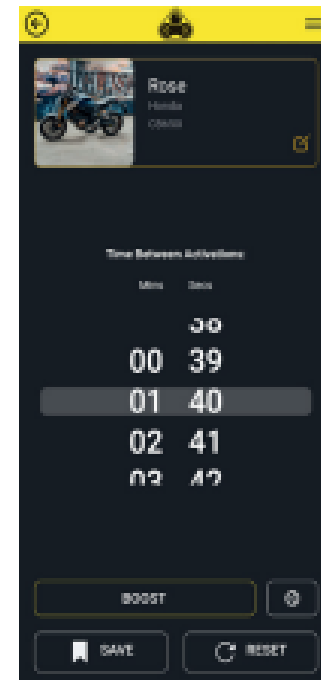

- Modifying the 'On Time at Activation' will change the amount of time that the oil is dispensed at each activation. By default the system delivers one 'drop' of oil per activation. This can be increased or decreased to optimise your oil delivery
- Adjusting the 'Wake Sensitivity' influences how much movement is required for the system to go into active oiling mode. By default the system is set to maximum sensitivity so reducing this will make the system activate when you hit a higher level of activity (ie. speed)
- Normal 'Operation Mode' activation means the system will deliver oil if the motorcycle is moving and stop delivery when there is no movement. The operation mode can be changed to either constant oil delivery regardless of movement (always on) or no oil delivery at all

The All New Scottoiler App

- You can also adjust the 'Time between Activations' from 10s to 20 minutes, adjustable in 1 second increments. This broad and granular range of adjustability gives the xSystem 3.0+ the widest operating range and finest level of adjustment for the flow rate of any Scottoiler product

Unrivalled Performance

- The xSystem 3.0+ and micro xSystem 3.0+ use a market leading Silicon Labs BGM220S Wireless Gecko Bluetooth® Module:

[BGM220S Wireless Gecko Bluetooth® Module Data Sheet \(silabs.com\)](https://www.silabs.com/documents/public/data-sheets/BGM220S-Wireless-Gecko-Bluetooth-Module-Data-Sheet.pdf)

- All compliance documentation will be hosted on the Scottoiler knowledgebase:

<https://marketingengineer.de/secure/xsystem-v3-0-documentation/63/>

- The xSystem 3.0+ and micro xSystem 3.0+ take the Scottoiler range another step forward as the ultimate plug and play solutions to chain maintenance
