WEIGHT SAVING: **-7,4 Kg**

ZARD PERFORMANCE : **+2,1 Hp**

DYNO TEST

— ZARD PERFORMANCE
— STANDARD EXHAUST

+2,1 Hp

The new range of Zard exhausts for the **Triumph Scrambler 400 X** is the result of technological research, development, and design from the Zard Centro Stile. Zard offers a **Full Kit racing** composed of a stainless steel manifold and silencer. The result is a product handcrafted in Italy, characterized by extreme lightweight (**-7.4 kg** compared to the standard exhaust system) and a significant increase in performance (**+2.1 hp** compared to the stock exhaust system). These qualities are attributed to a distinctive design and an underframe mounting solution that underscores the strengths of a motorcycle featuring a premium structure, accompanied by an invigorating sound profile in authentic Zard fashion.
