

38405 Moto Guzzi V100 Mandello Engine Guard Fitting Instructions

Kit Includes:

1X	C38405	Engine Guard
3X	CFK38405	Brackets
6X	CBOLM60001	M6 X 16mm Flanged Button Head Bolt
6X	CWASM60004	M6 Plastic Washer
4X	CBOLM80017	M8 X 12mm Flanged Button Head Bolt
6X	CPNUTM60001	M6 Aluminium Rivet Nuts (Pre-fitted to brackets by Pyramid)

Helpful notes: A paddock stand can assist when fitting this product.
Place something soft underneath the bike when positioning the engine guard to avoid damage.
A small box/block of the appropriate size can be useful for positioning/fitting the engine guard.

Attach the brackets to the engine using the M8 + OEM fittings as shown in **Fig 1** below (fully tighten).

Attach the engine guard to the brackets using the M6 fittings supplied (loosely tightening at first is helpful for a successful fit).

Check fixings periodically.
